(City Council/Redevelopment Agency) Study Session Held - Circulation Element Update to Evaluate the Long-Term Transportation Needs of the City and Presented a Comprehensive Plan to Accommodate Those Needs. The Element Consists of the General Location and Extent of Existing and Proposed Major Thoroughfares, Transportation Routes, Terminals, and Other Local Public Utilities and Facilities, All Correlated with the Land Use Element of the Plan.

Interim Administrator Paul Emery called on Mary Beth Broeren, Planning Manager, who gave a brief update of the Circulation Element and then introduced Ricky Ramos, Senior Planner, who presented the first portion of the PowerPoint report, which included the following information: Circulation Element: Background, Government Code Requirements, Purpose, and Milestones.

E-1

Bob Stachelski, Transportation Manager, presented the second portion of the PowerPoint report that included the following information: Topics Addressed, Circulation Element Committee, Next Steps and Public Participation.

Manager Broeren advised Council that staff does not recommend working with a large community group and identified difficulties previously experienced. She indicated that the proposed working group of two liaisons each from the City Council, Planning Commission and Public Works Commission has worked strategically with other elements. She added that staff is not recommending dramatic changes to the Circulation Element, but is proposing the elimination of inconsistencies from what was adopted in 1996.

Councilmember Carchio expressed agreement with keeping the working group small, and thanked staff for doing a great job in outlining items that need to be addressed.

Mayor Pro Tem Bohr questioned if the proposed amendments to the Circulation Element required only City action or if other agencies are involved and Manager Stachelski responded that Orange County Transportation Authority (OCTA) has a separate, specific amendment process. Council asked how many amendments to our Circulation Element require OCTA review, and staff replied six to eight amendments.

Councilmembers Green and Hansen expressed interest in participating in the working group, and Councilmember Carchio shared interest in serving as alternate. Councilmember Hansen indicated his hope that the group would meet on dates and times that didn't conflict with his work schedule, and staff expressed a willingness to work with the liaisons' schedules.

Councilmember Hardy asked if the Circulation Element would address review and implementation of traffic signals needed throughout the City where there are currently stop signs. Manager Stachelski responded that the Element would not address that level of specificity, but that Public Works has other programs to address those needs.

Staff indicated that the first meeting of the working group is expected in early May.
